# CSI 210 : Workstation Arch/Support

This course covers the theory of the components that make up a PC workstation, including network connectivity. As part of the course, a complete PC will be built from parts. Operating Systems (such as Windows) will be installed and configured, with a network interface. Various systems files will be looked at, including the Windows Registry. Application, virus protection software programs will be installed and configured. Students will research a topic in technology and provide a presentation to the class; and write a term paper describing an upgrade strategy for a given PC configuration. This course will assist the student in preparing for the A+ Certification Exams.
