

NSG 332 : Assessment for Health Promotion & Risk Reduction

Focus of this course is on the development of assessment and critical thinking skills needed by the nurse in the data collection phase of the nursing process and includes nursing history, vital signs, interpretation of routine laboratory data, and the physical examination. Opportunities will be provided for skill development in communicating effectively and in a caring manner, while collecting subjective and objective data, identifying factors that present health risks or actual overt alteration in functional patterns and health status, developing outcomes and health promotion and risk reduction interventions related to the helping and teaching coaching domains of practice, and documenting all aspects of the nursing process.

Credits 3

Prerequisites

BIO 201 & BIO 202
