

Majors & Minors

To view a program program requirements use the [Majors & Minors](#) button on the Catalog main page.

Declaration of a major program begins with the Admission application. A major is defined as sequential study in a subject or field of at least 30 semester hours that provides knowledge of breadth and depth in that subject or field. Courses are completed in accordance with a plan devised by the department, also known as, suggested program of study.

- Students must complete at least one half of the major program in residence as Sage institutional credits.
- Students must achieve a major GPA of 2.200 (minimum) in order to graduate. *Note: some academic programs have higher GPA requirements. See GPA chart below.
- 120 total credits are required for a bachelor's degree (minimum). See [Graduation Requirements](#) for additional information.
- Double major or dual major: is a program of study in which a student meets the requirements of two distinct majors in a single bachelor's degree.
- [Linked & Accelerated Programs](#) - UG to GR
- **Major Change Requests:** students wishing to change their major or add/change/drop a minor may do so by sending an email message from their Sage email account to academicadvising@sage.edu indicating. In the email, students should indicate the new major or minor they wish to declare. Please see the [Major Program Admission Criteria](#) chart for academic programs that have distinct admission criteria and/or limited space availability
- All academic program changes require the approval of the Advising Office.

Minors

A minor is a cohesive group of courses that allows students to explore, in a structured way, an area of interest outside the major. Each minor is defined by one or several academic departments and consists of at least six courses usually totaling 18 to 24 credits. Minors are commonly declared at the end of the sophomore year. Upon declaration of a minor, students are assigned to a faculty advisor in that program.

- Successful completion of at least one course in the discipline is a prerequisite to such declaration.
- Minors may be declared any time before the completion of the drop/add period in the first term of the senior year or before completion of 87 credit hours, whichever comes later.
- Only two of the required minor courses may also count toward major or another minor's requirements.
- At least one-half of the required credits for the minor must be completed at Sage.
- Minors are designated on student transcripts if all requirements are met, including a GPA in the minor of at least 2.200.

Academic Exploration

Freshman students who are undecided or do not wish to declare a major at the time of matriculation (undeclared) may enter the Academic Exploration program (AEX) and will be assigned an advisor who specializes in academic and career counseling. Students in the Academic Exploration program will take a combination of courses in satisfaction of General Education [requirements](#) and in areas of potential academic interest. Students may stay in the Academic Exploration program up to the completion of 45 credit hours or first year of study, at which point, they will be expected to declare a major program. Because many programs at Sage are dedicated to preparing students to enter professions that have specific course requirements and prerequisites, Academic Exploration students work closely with the Office of Academic Advising to select courses in a potential major that will allow them to integrate seamlessly into a particular discipline. In addition to academic advisement, students are encouraged to speak with faculty, career planning staff and alumni. Students may also benefit in completing the [Focus 2 Career Assessment](#) program. **Important Note:** Diplomas are not granted for academic exploration. In order to earn a bachelor's degree, students must successfully complete a major program.
