

# PSY 101 : Introduction to Psychology

This course introduces the scientific study of behavior and cognitive processes. The topics include the biological and social bases of behavior, motivation, emotion, learning, cognition, perception, personality, and psychotherapy. Students are introduced to the origins of psychology and the bases of psychological reasoning. Students are expected to become familiar with the basic principles in the major areas of the field as well as psychological methods of investigation. PSY 101 is a prerequisite for all psychology courses except PSY 207.
